

Angiogenesis: A Key Target in Oncology

Barcelona, Spain

Friday, October 30 – Saturday, October 31, 2009

Chairmen:

Eric Van Cutsem, MD PhD & Emile Voest, MD PhD

Scientific Course Coordinator:

Matti Aapro, MD

The field of angiogenesis has evolved from theory to practical clinical application. The initial successes promise that this area will become very important for cancer patient care. There are many questions that will need evaluation, and EORTC is looking forward to these developments. We wish great success to this meeting, organized in collaboration with several distinguished members of EORTC.

Prof. E. Van Cutsem

This course is being supported by unrestricted grants from Roche and Wyeth.

Wyeth®

*In collaboration with
the EORTC GI Group*

FRIDAY, OCTOBER 30, 2009

Registration opens at 10:00 am

Lunch buffet available from 12:00 noon

13:30-13:40 *Introduction* Eric Van Cutsem, Emile Voest, Matti Aapro

Session I: Basic knowledge

Session chair: E. Van Cutsem

13:40-14:05 *Understanding the process of angiogenesis and cancer* Peter Carmeliet

14:10-14:35 *Predictive markers for activity and toxicity* Emile Voest

14:40-15:05 *Anti-angiogenic agents on the horizon* Henk Verheul

15:10-15:35 *Tumor rebound: is there clinical evidence?* David Miles

15:40-16:05 *Keynote Lecture: Mechanism of resistance to angiogenesis inhibitors* Napoleone Ferrara

16:05-16:30 *Coffee break*

Session II: Imaging tools for determining the activity of angiogenesis inhibitors

Session chair: M. Aapro

16:30-16:50 *MRI* Anwar Padhani

16:55-17:15 *Ultrasound* Nathalie Lassau

Session III: Lung and Prostate cancer

Session chair: J. Bellmunt

17:20-17:40 *Angiogenesis inhibition in Prostate cancer* Joaquim Bellmunt

17:45-18:05 *Angiogenesis inhibition in Lung cancer* Jürgen Wolf

18:10-18:15 *Adjourn day 1*

SATURDAY, OCTOBER 31, 2009

Session IV: RCC and Breast cancer

Session chair: M. Aapro

- 08:30-08:50 *Angiogenesis inhibition in RCC* Camillo Porta
- 08:55-09:15 *Other biologicals, incl. mTOR in RCC* Joaquim Bellmunt
- 09:20-09:40 *Angiogenesis inhibition in Breast cancer* Nadia Harbeck
- 09:45-10:15 Coffee break

Session V: GI cancer

Session chair: M. Ducreux

- 10:15-10:45 *Angiogenesis inhibition in metastatic Colorectal cancer* Eric Van Cutsem
- 10:50-11:10 *Angiogenesis inhibition & surgery in Colorectal cancer* Theo Ruers
- 11:15-11:35 *Angiogenesis inhibition in adjuvant treatment of Colorectal cancer* Aimery De Gramont
- 11:40-12:00 *Angiogenesis inhibition in Gastric cancer* Michel Ducreux

Session VI: Emerging Indications and Drugs

Session chair: E. Voest

- 12:05-12:20 *Angiogenesis inhibition in Glioblastoma* Roger Stupp
- 12:25-12:40 *Angiogenesis inhibition in Ovarian cancer* Andrew Clamp
- 12:45-13:00 *Angiogenesis inhibition in combination with Radiotherapy* Christopher Willett
- 13:05-13:20 *Differential Drug safety in anti-angiogenic therapy* Jean-Philippe Spano
- 13:30-13:50 Learning assessments:
Attendees answer 15 questions based on the course.
- 14:00-15:00 Lunch-buffet and certificate delivery

Angiogenesis: A Key Target in Oncology

Course Objectives

This course will provide the background for oncologists to understand the basic science and the clinical achievements in angiogenesis related cancer therapy.

This is intended to be a practice oriented course, helping decision making processes for the clinician. Participants will have an opportunity to discuss patient case studies and interact with experts as well as receive updates on the latest data and advances in this field.

This is a teaching course in cooperation with the EORTC-GI Group.

Accreditation

This course has been CME-certified by ACOE with 8 European CME credits. Each participant will receive a certificate of attendance stating the relevant number of credits obtained during the conference.

Venue

Hotel AC Barcelona
Passeig Taulat 278
08019 Barcelona, Spain

Target Audience

Physicians and Other Healthcare Professionals
